### MARKET REVIEW

On May 1 the Department declared and reallocated to western hemisphere countries an additional deficit of 200,000 tons in the sugar quota for Puerto Rico. The deficit in 1969 quota for Puerto Rico, together with earlier determined deficits, now totals 700,000 tons. None of the deficit was allocated to Peru since information available to the Department indicated that because of drought Peru will not be able to produce sufficient sugar to market more than its present quota of 442,886 tons. Details of this action are set forth beginning on page 6.

Primary distributors' sales of sugar for the year through May 10 totaled 3,333,000 short tons, raw value, according to preliminary reports. This was about 80,000 tons less than reported during the comparable period of 1968 but about 90,000 tons more than during the same period of 1967. Cane sugar refiners distributed 2,357,000 tons of the total compared with 2,498,000 tons last year and beet processors about 918,000 tons compared with 839,000 tons through May 10, 1968. In addition to the reported deliveries referred to above, beet processors physically delivered in January and February of this year 217,000 tons of sugar which was sold in December and charged to 1968 quotas.

Regionally, deliveries of refined sugar by states during the first quarter of 1969 were down 4.4 percent from the first quarter of 1968. Two of the geographical regions - New England and the South were up -- 6.1 percent and 2.1 percent, respectively -- while the West declined the most -- 13.4 percent - followed by the North Central region which was down 9.4 percent and the mid-Atlantic region, down 1.7 percent.

Twenty-three states had increased deliveries of sugar in the first quarter of 1969 compared with the same quarter of last year, 25 had smaller deliveries and two had about the same. Florida increased the most - up 171,000 hundredweight followed by Georgia up 115,000 hundredweight and New York up 104,000 hundredweight. Of the remaining states with larger deliveries, six were in the New England region, two were in the North Central region, eight were in the South and four were in the West.

States receiving less sugar in January-March 1969 as compared with these months of last year included Illinois, down 1,005,000 hundredweight and California down 674,000 hundredweight. Three other states, Pennsylvania, Michigan and Missouri had decreases of more than 100,000 hundredweight.

Preliminary reports of stocks of raw and refined sugar held by all primary distributors as of May 3, 1969 totaled 2,722,000 short tons, raw value. This was 200,000 tons more than on the same date last year but about 15,000 less than at the end of March 1969. Cane refiners' stocks of 915,000 tons were 8,000 tons less than at the end of April last year but 207,000 tons more than on March 31, 1969. Beet processors' stocks of 1,449,000 tons were 224,000 tons more than at the end of April last year and 164,000 tons less than at the end of March this year. Cane refiners' stocks, which were badly depleted during the early part of the year because of the waterfront strike, increased significantly during April and are now more in line with the seasonal level of stocks in years past.

During the first quarter of 1969, sellers announced increases in quoted wholesale prices for refined sugar sold in the basis pack - 100- pound paper bags - in all the sales territories. These increases were .25 cent per pound from 10.00 cents to 10.25 cents in the Chicago-West, Eastern beet and Southwest territories; .20 cent in the Northeast and Southeast from 11.05 cents to 11.25 cents and from 10.65 cents to 10.85 cents per pound respectively; and .15 cent in the Gulf, intermountain Northwest and Pacific Coast territories or from 10.50 cents to 10.65 cents per pound in the Gulf, from 10.00 cents to 10.15 cents per pound in the intermountain Northwest and from 10.10 cents to 10.25 cents per pound in the Pacific Coast territory. The announcements stated Pacific Coast refiners were accepting day-to-day orders for industrial products at levels .15 cent per pound below list prices.

During the period since the issue of April Sugar Reports, several additional increases in the quoted price for sugar sold at wholesale have been announced by sellers. On April 25, a cane sugar refiner announced an increase of .25 cent per pound, from 11.25 cents to 11.50 cents per pound, in the quoted price for sugar sold in the Northeast and .15 cent per pound, from 10.50 cents to 10.65 cents for sales in the Gulf territory. The announcement stated that orders would be accepted for the Northeast at the increased quotations until close of business May 9 for delivery May 19 through June 27, and for the Gulf territory at 10.40 cents per pound for delivery during the same period.

Also, on April 25 another cane sugar refiner announced that in the Chicago-West territory industrial products would continue to be priced at the 10.10 cents per pound basis through May 16. This in effect met earlier competitive offerings by other sellers.

On May 1, a cane sugar refiner announced that effective opening of business May 19 in the Chicago-west sales territory the quoted price for refined sugar in 100-pound bags would be increased .25 cent per pound, from 10.25 cents to 10.50 cents. In addition, the announcement stated that contracts for the delivery of industrial products during the period May 19 through June 27 would be considered at 10.35 cents per pound, provided orders were submitted by May 16. As of May 19, the following were the quotations for refined sugar sold in the basis pack:

	<u>Cane</u> <u>Cents per pound in 100 lb. paper bags</u>	<u>Beet</u>
Northeast	11.50	
Southeast	10.85	
Gulf	10.40	
Eastern beet		10.35
Chicago-west	10.25/10.50	10.25/10.50
Direct shipment territory	10.15/10.40	10.15/10.40
Lower Pacific Coast	10.10	10.10
Northwest intermountain	10.15	10.15

The U.S. average retail price for refined sugar sold in 5-pound paper bags during March was 12.28 cents per pound, up from 12.20 cents in February this year and 12.12 cents in March of last year.

The duty paid spot price for raw sugar delivered to New York, as quoted on the New York Coffee and Sugar Exchange, averaged 7.80 cents per pound during April - up from 7.76 cents in March and 7.42 cents in April of last year. For the first four months of this year the spot price averaged 7.73 cents per pound compared with 7.39 cents for the same months last year. The quotation has been 7.82 cents per pound since April 24 and for the period May 1 through May 19 averaged 7.82 cents compared with 7.41 cents during the same period last year.

Cane sugar production in Puerto Rico got off to a slow start this year because of rainy weather. The unfavorable weather caused large amounts of trash in the sugarcane which in turn reduced the yields of sugar per ton of cane. Sugar production through May 4 totaled 360,000

short tons, 96<sup>0</sup> basis, compared with 490,000 tons during the comparable period last year. Yields of sugar per ton of cane have averaged 8.932 percent this year compared with 9.884 percent during the same period last year.

Production of cane sugar in Hawaii through May 3 this year amounted to 204,532 tons, 96<sup>0</sup> basis compared with 294,478 tons during the same period last year. Production this year has lagged behind last year because of a strike which closed 23 of the Hawaiian sugar plantations during late February and early March. Production is expected to be at an accelerated rate during the balance of the year so that all but a small part of the production lag should be made up by year end.

The spot price for world sugar although backing and filling during the last month continues to display strength. The quotation, as established by the Spot Committee of the New York Coffee and Sugar Exchange for raw sugar f.o.b. and stowed at Greater Caribbean ports, including Brazil, averaged 3.41 cents per pound for the first four months of 1969. During these same months last year the quotation averaged 2.04 cents. The average for April 1969 was 3.76 cents per pound compared with 3.70 cents in March and 1.84 cents in April of last year. The quotation reached a high for the year on April 11 when it was 4.00 cents per pound after which it declined to 3.48 cents on April 25. On April 30 the quotation rose to 3.55 cents and continued to rise reaching 3.80 cents on May 6. From May 7 to May 12 the quotation was 3.65 cents per pound and on May 13 rose to 3.75 cents. On May 19 the quotation was 3.82 cents per pound and averaged 3.71 cents for the period May 1-19 compared with 1.78 cents during the same period last year. On May 19 futures contracts for World sugar quoted on the New York Coffee and Sugar Exchange ranged from 3.84 cents per pound for delivery in July 1969 to 3.95 cents for September 1970 delivery.

F. O. Licht released his second estimate of the 1968-69 World sugar balance on May 8. He calculates that world stocks of sugar after hovering in the area of 18.6 million metric tons for three successive

years are expected to decline to 17.3 million tons at the end of the September 1, 1968 to August 31, 1969 year. This would mean that initial stocks for the 1969-70 year would be about 24 percent of consumption expected for that year. A year earlier the comparable percentage was 26.8; two years earlier, 27.6; and three years earlier, 28.3 percent.

ADMINISTRATIVE ACTIONS RELATING TO 1969 SUGAR SUPPLIESPuerto Rican Sugar Deficit Reallocated:

The United States Department of Agriculture on May 1, 1969 declared an additional deficit of 200,000 tons in the sugar quota for Puerto Rico.

Together with earlier determined deficits totalling 500,000 tons, the deficit in the 1969 quota for Puerto Rico now amounts to 700,000 tons. Harvesting of the crop in Puerto Rico will not be completed for more than a month, and it may be that Puerto Rico can ship to the mainland more than the 440,000 tons which now remains in its adjusted quota. In that event, despite today's action, Puerto Rico will be able to market whatever sugar it is able to ship.

Information available to the Department indicates that Peru because of drought will not be able to produce sufficient sugar to market more than its present quota of 442,886 tons. Accordingly, none of the deficit declared in this action has been allocated to Peru.

This year's sugar quotas totalling 10,800,000 tons plus the more than 200,000 tons of refined beet sugar delivered in January and February of this year but sold in 1968 and charged to that year's quota, provides more sugar than has ever been consumed in this country in any year. Nevertheless, raw sugar has been available to cane sugar refiners this year only at advancing prices. Countries which have delayed their deliveries are urged to ship the bulk of the sugar remaining in their quotas between now and August. This course of action will avoid a piling up of shipments in the final months of the year after the period of heavy demand has ended.

The deficit, its proration and revised quotas are shown on the table on page 8.

ADMINISTRATIVE ACTIONSDate announcedNature of action

April 23,  
1969

The U. S. Department of Agriculture on April 23 announced revised processor allotments increasing the permitted entries of Puerto Rican sugar into the continental United States for direct-consumption during calendar year 1969.

The revised allotments totaling 162,000 short tons, raw value, reflect substitution of final data for estimated data on 1968 marketings in the allotment formula, an increase in the direct-consumption limit established when total 1969 sugar requirements for U. S. consumption were increased to 10.8 million tons (Press Release USDA 1134-69) and the allocation of the entire direct-consumption quota. (See April 26, 1969 Federal Register).

April 23,  
1969

The U. S. Department of Agriculture on April 23 announced revised processor allotments of the 1969 sugar quota for the Mainland Cane Sugar Area. These allotments, totaling 1,110,866 short tons, raw value, replace previously established allotments, totaling 1,094,400 tons, which were announced on March 28 (Press Release USDA 992-69). (See April 29, 1969 Federal Register).

May 2,  
1969

Approved local areas in seven states for sugarbeet producing area prevented acreage credit for 1968 crop of sugarbeets. (See May 8, 1969 Federal Register).

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. April 1969 sugar deliveries for continental U. S. consumption 866,000 short tons, raw value (preliminary), down about 38,000 tons from March 1969 and up 44,000 tons from April 1968, January-April 1969 deliveries 3,072,000 short tons, raw value, down 60,000 tons from January-April 1968. Final data for March 1969 deliveries 903,000 short tons, raw value - previously published preliminary as 880,000 tons.

2. Primary distributors' stocks May 3, 1969 were 2,722,000 short tons, raw value (preliminary), up 200,000 tons from a year ago, and down 15,000 tons from March 31, 1969. During April refiners' stocks increased 207,000 tons, beet processors' stocks decreased 164,000 tons, mainland cane processors' stocks decreased by 56,000 tons and importers of direct consumption sugar stocks decreased by 2,000 tons.

3. Charges to quotas January 1 to April 30, 1969 were 3,891,792 short tons, raw value, leaving a balance of 6,908,208 tons to be supplied within the 10,800,000 ton total.

4. Regionally, January-March deliveries, 1969 as compared to 1968 were up in two of the 5 regions: Increases -- New England 6.1 percent, South 2.1 percent - Decreases - West 13.4 percent, North Central 9.4 percent and mid-Atlantic 1.7 percent.

1/ Spot prices are for bulk sugar under Contract No. 10 which, beginning November 21, 1966, replaces Contract No. 7. The terms of these contracts are duty paid or duty free, full duty rate .625 cent per pound.

2/ Spot prices are those under No. 8 Contract which is for bagged sugar f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ The No. 10 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports 81 January 1959, pages 5 to 9.

1/ Gross basis price in 100-pound bags subject to a 2 percent discount.

2/ Hydrate, commercial bags less than carlots, ex whse., N.Y. 100 lbs. Beginning April 1964 price is for 600 bag carload f.o.b. N.Y.

3/ For regular conversion sirup (38-49 D.E.) per cwt. in tank cars f.o.b. New York, except February 1962 to April 1964 price is for drums in less than carlots. Quoted as 42° Baume unmixed, except beginning March 1956, quoted as 43° unmixed.

4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.
